

## **TMID SERVICE LAB**

The TMID service lab operations are centralized at a fully equipped service center in Bangalore with engineers present at other major locations. The Service Centre is manned by well-qualified and trained engineers so as to extend the best service to our customers.

The Service lab has range of test of equipments from well known manufacturer to test the units completely. The repair works will be carried as per the standards procedure meeting OEM requirement. Once unit is ready after repair, complete performance verification will be carried out before dispatch.

We repair major manufacturer's Test and measuring instruments and perform calibration after repair. We take comprehensive AMC and Non-comprehensive AMC for T&M equipments from various customers.
