Hotels Ramp Up Hiring as Business Gets Going

Rise in travel, new properties driving recruitment across levels

Anumeha.Chaturvedi
@timesgroup.com

New Delhi: Leadership reshuffles and senior-level movements are back and hiring sentiments are high in the hospitality industry, following a promising pickup in business.

Chains such as Marriott International, Sarovar Hotels, Accor and the Oberoi Group have announced changes at the leadership level. EIH, the flagship company of the Oberoi Group, said on Wednesday that executive chairman and director PRS Oberoi was relinquishing his position, and that it was appointing Arjun Singh Oberoi as executive chairman. Sarovar Hotels appointed Jatin Khanna as the new chief executive for the brand this week. Before joining Sarovar, Khanna was with Marriott as vice president-North India, Bhutan and Nepal.

Marriott International appointed Ranju Alex as its area VP for South Asia last month. Before this, she was the market VP for West India. Accor named Laure Morvan its chief development officer for India, the Middle East, Africa and Turkey last month.

Hiring for other roles is also on an upswing. A Marriott spokesperson said during the pandemic, hotels had scaled down the

workforce composition proportional to business volumes, but that is now lifting in major markets including the metros and tier-2 cities in India.

"The hotel industry in general is inclined towards evaluating the talent needs in the current scenario and is prioritising bringing back roles which were not very active from the last 24 months. The roles that come into focus include spa specialists, roles of senior executives overseeing operational disciplines, guest-facing areas like guest relations, specialty restaurant niche roles like expatriate chefs and mixologists," the spokesperson said.

Nikhil Sharma, regional director, Eurasia, at Wyndham Hotels & Resorts, said the company opened hotels in Udaipur, Mohali,

Varanasi and Jaipur, adding close to 500 employees in the past six months. "We have doubled the business development team and strengthened the commercial, operations and IT teams.

Sudeep Jain, MD-Southwest Asia at the InterContinental Hotels Group, said the chain is hiring more people across roles. "We have a significant number of hotel openings between 2022 and 2023; therefore, our pace of hiring will pick up further in the coming months," he added.

Rituparna Chakraborty, co-founder of staffing services company TeamLease Services, said given how difficult it has been to get rooms in good hotels with the easing of restrictions, hiring in the hospitality industry is improving day by day.

BI Luxury Residences Ties Up with Oberoi Hotels & Resorts

New Delhi: Delhi-based BI Luxury Residences has tied up with Oberoi Hotels & Resorts to manage the services at the upcoming luxury project in central Delhi. Shashank Bhagat, chairman of BI Group,

told ET. The company is currently developing 19 boutique apartments in central Delhi, next to Oberoi flagship hotel. The companies are also in talks to develop similar super-luxury apartments in

Bengaluru and Goa, in addition to expanding in Delhi.

The apartment sizes will be in the range of 4,000-8,000 square feet. —Faizan Haider

Adani Power Q4 Net Soars to ₹4,645 cr

MUMBAI Adani Power on Thursday posted a multi-fold jump in its net profit at ₹4,645.4 crore in the quarter ended March 2022, up from ₹13.13 crore a year ago. The increase in profit is largely on account of higher revenues. Anil Sardana, MD of Adani Power, said, "In the coming years, we will focus on utilising our fleet to the highest extent while guiding our acquisitions and greenfield assets to become value accretive investments."

Dabur Q4 Net Profit Falls 22% to ₹294 cr

NEW DELHI Packaged consumer goods maker Dabur posted 22% decline in consolidated net profit to ₹294.2 crore for the fourth quarter ended March and cited "dramatic rise in input costs" as the biggest challenge during the quarter. CEO Mohit Malhotra said the company responded to inflationary challenges with a mix of pricing actions and cost control measures. —Our Bureau

Marico Q4 Profit Rises 13% to ₹257 cr

NEW DELHI FMCG firm Marico on Thursday reported a 13.2% rise in consolidated net profit to ₹257 crore for the fourth quarter ended March 2022. Revenue from operations rose 7.4% to ₹2,161 crore during the quarter under review, against ₹2,012 crore a year ago. —PTI

Refurbished Devices in Demand as Prices of Smartphones Surge

But '22 segment may be slower vs '21

Subhrojit.Mallick
@timesgroup.com

New Delhi: Rising smartphone prices are fuelling recommerce growth with the refurbished smartphone segment expected to register early double digit growth in 2022, though at a tapered rate owing to supply challenges.

Counterpoint Research estimates that the refurbished phones market could grow 13% year on year in 2022, compared with 25% in 2021. The research firm said India reported a 14% hike in average selling prices to ₹17,000 in 2021, leaving price-sensitive consumers seeking affordable smartphones in a lurch.

"Affordability continues to be a challenge, and hence the demand for refurbished phones has almost doubled since before the pandemic," Jayant Jha, CEO, Yaantra, told ET.

For example, the refurbished version of a flagship model can be cheaper by as much as 60% in some cases, say industry experts.

Quirk said in January-March quarter, 78% of the demand for refurbished phones came for devices priced under ₹10,000.

Flipkart-owned Yaantra, which dabbles in smartphone repairs and refurbished smartphones, is also seeing new avenues of growth among teenagers in India. "The demand has unlocked for the teenagers below 15 years, which saw a surge for smartphones initially from online classes,

Refurbished version of a flagship model can be cheaper by up to 60%

Refurbished phones mkt grew 25% in 2021

Growth in 2021 was higher due to work-from-home & study-from-home scenarios

and then due to a strong push for entertainment and gaming," Jha added.

But growth in 2022 is expected to be sharply slower than in 2021. Last year, businesses and individuals were procuring refurbished smartphones at a higher rate to set up and sustain work-from-home and study-from-home scenarios, according to refurbished-market specialist Glen Cardozo from Counterpoint Research.

Quirk said there has been a decline in demand for refurbished phones across price ranges and brands since December 2021.

Besides, supply issues are plaguing the refurbished segment as much as new smartphones.

This surge in demand is also creating challenges in supply for players in the organised refurbished smartphone segment.

HC Puts Interim Stay on ED Order Seizing Xiaomi India's Assets

Court posted the matter for further hearing on May 12

Our Bureau

New Delhi: The Karnataka High Court has passed an interim order, putting a stay on the Directorate of Enforcement (ED) order seizing Xiaomi India's assets worth ₹5,551.27 crore for allegedly flouting laws under the Foreign Exchange Management Act.

Justice Hemant Chandangoudar of the high court stayed the seizure since Xiaomi India operates the accounts for carrying out day-to-day activities of the company. The court posted the matter for further hearing on May 12.

The order copy was not available at press time, but a person familiar with the matter confirmed the order. Xiaomi did not reply to ET's email seeking comment.

Senior counsel S Ganesh and Sajjan Poovayya, appearing for the smartphone market leader, argued that paying royalties was not a violation of the FEMA Act, and that similar payments were made by other manu-

facturers and dealers of smartphones to the same US company to which it paid the royalty, for the same technologies used by Xiaomi India. Such royalty payments for technology have also been considered lawful by the Income Tax Department, and is even considered a value-added activity, they submitted.

The ED had passed an order last week stating that assets worth ₹5,551.27 crore lying in Xiaomi India's bank accounts had been seized by the agency. It alleged that Xiaomi India was making payments to three foreign entities, including one under the Xiaomi group, under the guise of royalty payments.

The ED also claimed misleading information while remitting the money abroad. Xiaomi India is a wholly owned subsidiary of the China-based Xiaomi Group.

AS COVID CASES RISE...

Online search for medical assistance sees uptick

Mumbai led the search for Covid-19 vaccination centres and Delhi was looking for pharmacies: Just Dial survey

ABHISHEK LAW

New Delhi, May 5

The search for vaccination centres, ambulances, oxygen and other Covid-related key items has gone up across Indian cities as infections witness an uptick. This also comes a year after the country saw the devastating second wave.

The survey, carried out by Just Dial, said Mumbai led the searches for vaccination centres, while Delhi witnessed a surge in Covid-related online search for pharmacies.

Demand for pharmacies Just Dial, in its consumer insight report, said the demand for pharmacies con-

tributed to 52 per cent of its total hits and vaccination centres at 30 per cent.

Search for ambulances accounted for 9.25 per cent, while Covid tests accounted for over 4 per cent of total numbers. Search for oxygen cylinders made up for 2.5 per cent.

The top-10 cities that generated the search traffic include Mumbai, Delhi, Bengaluru, Hyderabad, Chennai, Pune, Kolkata, Ahmedabad and Chandigarh.

Nearly 51 per cent of the searches from Tier-I cities are from Delhi and Mumbai. Bengaluru saw 40 per cent month-on-month (April versus March) jump

In Chandigarh, the demand for ambulances shot up by 36% in April

in searches, followed by Pune and Delhi - up 24 per cent and 14 per cent, respectively.

"Besides pharmacies, over the last two years, we have also aggregated a whole lot of emergency health service

providers across India's Tier-I and Tier-II cities," said Prasun Kumar, CMO, Just Dial, adding that vis-à-vis the third wave, the search for oxygen cylinders remained significantly low, with Delhi and Mumbai

generating queries followed by Hyderabad.

"During the Omicron wave, searches for pharmacies contributed to almost 82 per cent of the total searches related to health-care; and this time around, it is 52 per cent with demand for vaccination centres and test centres going up significantly," he told BusinessLine.

In the case of Tier-II cities that include Chandigarh, Jaipur, Nagpur, Indore and Patna, Covid-related health services continued to be among the most searched. In Chandigarh, Lucknow and Jaipur, pharmacy was a dominant topic for online search. Nagpur topped the demand for vaccination centres, followed by Indore and Jaipur.

Demand for ambulances in Chandigarh shot up by

36 per cent in April versus March.

Jaipur and Coimbatore saw maximum demand for Covid testing centres, followed by Chandigarh, while in Lucknow, Jaipur and Gorakhpur, the maximum searches were for oxygen cylinders.

Covid count

India, on Thursday, recorded 3,275 new Covid infections, pushing the number of active cases to 19,719 and the overall tally to 4,30,91,393, according to the Union Health Ministry data. There have been 55 fatalities; 52 of them were from Kerala in a 24-hour span.

The active cases constitute 0.05 per cent of the total infections, while recovery rate stood at 98.74 per cent. The daily positivity rate was at 0.77 per cent.

MEITY DIRECTION TO VPN FIRMS

'Diktat calling for storage of user data may face backlash'

DEBANGANA GHOSH

Mumbai, May 5

Industry experts believe that companies and enterprises, getting impacted by The Ministry of Electronics and Information Technology's (MeitY) new directions to virtual private network (VPN) service providers to store data of Indian users for up to five years, may move to oppose the policy.

VPN is used to hide location as well as encrypt information being transferred between the sender to receiver. This could be the data of an enterprise sent over cloud network and storage, or two individuals exchanging files.

'Quite astonished'

"We're quite astonished at this policy move by the world's largest democracy, which is on the brink of becoming the world's largest police state. We are reaching out to Indian authorities and reviewing the policy guidelines to assess what it means for foreign companies serving users in India. PureVPN is a no-log VPN; user anonymity and security is a central priority, but if that is compromised by this policy, then we will have to consider our position in India," Uzair Gadit, Co-Founder & CEO, PureVPN, which has over 3 million users worldwide, told BusinessLine.

He added: "The policy suggests that details, including user name, e-mail address, phone numbers and IP addresses, among other data, need to be stored for at least five years. However, PureVPN

stores no identifiable information, nor does it record or store user activity, so this presents a significant risk for our users. More widely, this will impact the wider VPN industry."

Data centre companies and cryptocurrency exchanges, too, were asked to collect and store user data by The Indian Computer Emergency Response Team (CERT-In), which works under MeitY. Additionally, VPN companies will have to regularly report the cases around the 20 cyber security vulnerabilities listed by CERT-In in its previous directions.

According to Amitabh Singhal, Director, Telless Consulting Services, and former President of Internet Service Providers Association of India: "The enterprises and service providers will certainly have a problem with such 'omnibus directions' (opposed to specific event/s specific lawful interception actions by LEAs), which force them to keep and share users and usage related data/information about each other with the government agencies. Generally, VPN services are not expected to keep such data. At the same time, the govt provides no corresponding guarantees and reliable processes of how it will keep and use the information."

WHO pegs global death toll from Covid-19 at 14.9 million

India among the top countries accounting for excess deaths

PT JYOTHI DATTA

Mumbai, May 5

The World Health Organization has estimated the global death toll associated with Covid at 14.9 million, more than double the reported number between January 2020 and December 2021. And India, with an estimated 4.7 million deaths in this period, featured among the top 20

countries accounting for 80 per cent of the excess mortality, said the WHO report.

The estimated global and India death toll were way higher than the numbers reported to the WHO at 5.4 million and 4,81,000 for the period.

India, though, had pushed back on the data and methodology of the WHO in estimating the overall toll.

Even as WHO representatives briefed the media on the latest statistics, the Union Health Ministry issued its rebuttal against the use of mathematical models to arrive at the final estimate. "WHO has

released the excess mortality estimates without adequately addressing India's concerns. India had also informed WHO that in view of the availability of authentic data published through Civil Registration System (CRS) by Registrar General of India (RGI), mathematical models should not be used for projecting excess mortality numbers for India," said the Ministry.

In past consultations with the WHO, India had questioned the reliance on Global Health Estimates (2019) to arrive at India's final toll and the classification of the country

under Tier II, indicating countries where mathematical modelling estimates were used due to the absence of consistent data. WHO has not responded to India's contention, said the Ministry.

Responding to multiple queries on the India toll, Samira Asma, Assistant Director-General for Data, Analytics and Delivery at WHO, said they had consulted with representatives in India and would continue to do so. She explained that the report relied on expert opinions from a technical advisory team set up early in the pandemic, com-

prising representatives from multiple countries.

Somnath Chatterji, Senior Advisor, Department of Data and Analytics, said mathematical models were put in place because high-quality data were absent from some countries or only partly available in others.

Stephen MacFeely, Director, Department of Data and Analytics, pointed out that even prior to the pandemic, 6 out of 10 deaths were unregistered, a shocking statistic that underscored the need for countries to invest in their civil registry and vital statistics and health

information systems. Health data was important, they pointed out, not just to understand the pandemic and be prepared for other health emergencies, but also to plan targeted interventions.

Excess mortality

The WHO explained that excess mortality was calculated as the difference between the number of deaths that have occurred and the number that would be expected in the absence of the pandemic, based on data from earlier years. It included deaths directly or indirectly linked to Covid.

Sony Pictures bags exclusive media rights to broadcast French Open

OUR BUREAU

Mumbai, May 5

The battle for India's TV viewership for sporting events has intensified, with Sony Pictures Networks India (SPN) bagging the exclusive media rights to broadcast the French Open (also called Roland-Garros) between 2022 and 24.

The deal, spanning over three years, provides SPN with exclusive TV and digital rights of the French Open. The broadcaster will televise Roland-Garros on its sports channels across India and the subcontinent, including, Pakistan, Sri Lanka, Bangladesh, Nepal, Bhutan and Maldives, and will also live-stream it on its premium OTT platform, SonyLIV.

This comes even as Reliance Industries-backed Viacom18 recently announced the launch of Sports18, the network's dedicated sports

channel. Sports18 will be the new home to the premium sports properties, including FIFA World Cup Qatar 2022, NBA, LaLiga, Ligue 1, Serie A, Abu Dhabi T10, and top ATP and BWF events.

Sony Sports Network, meanwhile, has scaled up its presence in sports coverage, including the Australian Open.

Rajesh Kaul, Chief Revenue Officer, Distribution, and Head - Sports Business, Sony Pictures Networks, India, said: "Following the success-

ful broadcast of the Australian Open over the past years on our network, we are delighted to acquire the media rights of the prestigious Roland-Garros.

"The pedigree of the French Open will help us cater to the steadily growing tennis fan base in India. With this acquisition, we reiterate our goal to position Sony Sports Network as the home to marquee global sports events."

IPL media rights

All eyes are now on the bidding war for the Indian Premier League. Disney-Hotstar has the broadcasting rights at present, but the upcoming bidding is expected to see interest from Amazon, Viacom18, Sony Pictures, and even smaller broadcasters may vie for non-exclusive rights to broadcast select games.

Jio World Centre in Mumbai gets world's largest elevator

FORUM GANDHI

Mumbai, May 5

An elevator that can carry 200 people at the same time? Reliance Industries has installed the world's largest passenger elevator at the Jio World Centre (JWC) in the heart of Mumbai city at 25.78 square meters of space. To put it in context, the average size of a one bedroom flat in Mumbai is about 30 square meters.

'World-class experience'

The elevator, built by Finnish company Kone, took six years of planning. Rajmal Nahar, President, Real Estate Projects, Reliance Industries, said it was the company's endeavour to create a buzz in the world about JWC. "We wanted to create a monument that is not only a post card for Mumbai but for India. Mumbai is an international hub. We wanted to offer a world-class experience to those who landed in India. We have a phase-wise opening with the Jio Drive, the Fountain," he said.

Jio World Centre is spread over 18.5 acres. This elevator is the centrepiece of this facility. JWC also houses the largest

The engineering marvel and all the 188 elevators at the Jio World Centre have been installed by Kone elevators

banquet hall, "and it's no fun for just a handful of people from a baraat to enter in one go", Nahar quipped.

This engineering marvel and all the 188 elevators at JWC have been installed by Kone elevators. Amit Gossain, MD, KONE Elevators, told BusinessLine that it was planned for six years before the installation. While Gossain did not disclose the capex to install the big elevator, he said it was a multi-crore project. There were four simple briefs that Reliance wanted - "safe, swift, state-of-the-art and elegant" - Gossain explained.

He said "Reliance was clear on the fact that safety was important. It had also said that the

flow of people shouldn't stop and, lastly, it had to be elegant."

When asked about the difficulties while implementing a project of this scale, he explained "that the machine that carries the elevator is usually retrofitted on top of the elevator. However, in this case, it has been retrofitted at the bottom of the elevator. The machine itself is larger than the elevator. We had implemented a similar scale project in London, so we had the experience to handle the scale and size. However, we had to work around the climate conditions in India to make the elevator efficient for Indian weather conditions".

E-way bill generation dips in April; may hit May's GST collection

GSTN said 75.2 million e-way bills were issued in April

Gireesh Chandra Prasad
gireesh.p@livemint.com
NEW DELHI

Generation of e-way bills, which are needed to ship goods within and across states, eased a notch in April, suggesting that Goods and Services Tax (GST) collections this month could be lower than the previous month's record high.

Data from GSTN, the company that processes GST returns, showed that 75.2 million e-way bills were generated in April, lower than the 78.1 million raised in March. However, the number is still the second highest since November 2020.

Businesses will pay GST for April transactions in May.

March had witnessed a spurt in e-way bills as companies pushed inventories at the end of the financial year to meet their targets, leading to a record ₹1.68 trillion in GST revenue collections. The revenue to be collected in May for the transactions in April could reflect the slight moderation seen in e-way bill generation, which is taken by analysts as a high frequency indicator of economic activity.

Economic recovery and improved tax compliance have helped boost revenue collection in the recent past. It remains to be seen how the RBI's increase of its main policy rate by 40 basis points to 4.40% to tame inflation will impact consumption. RBI had earlier flagged that private consumption's share in gross domestic product is still a tad below pre-pandemic levels, going by FY22 estimates.

The S&P Global India manufacturing purchase managers' index had shown earlier this month that the manufacturing industry in India had a strong start to FY23, posting a marked expansion in new orders and production. PMI is based on a survey of 400 businesses, while e-way bill data is based on actual transactions.

Rising from 54 in March to 54.7 in April, the seasonally adjusted PMI highlighted a solid and faster improvement in operating conditions across the sector, according to S&P Global. Growth gathered momentum in the intermediate and capital goods segments, but there was a slowdown at consumer goods makers, it said on 2 May.

The e-way bill generation number for April is still the second highest since November 2020. MINT

GST collections were less impacted during the second wave of the pandemic in the first half of FY22 than during the first wave, which had severely depressed revenue in the first half of FY21. Revenue receipts significantly improved in the latter half of FY22 as the economy recovered and pent-up demand drove consumption. Experts also say that in addition to the anti-evasion measures taken by the tax authorities, a surge in commodity prices is also having an impact on GST revenue collections.

Brisk goods shipments across the country also helped truck rentals in April. Greater momentum in wheat and cereal harvesting and higher cargo movement from factories, coupled with improved consumer spending during the peak marriage season helped truck rentals in April despite a jump in diesel prices, the Indian Foundation of Transport Research and Training said. The growth in GST revenue collection in recent months highlights the revenue collection potential the new indirect tax system offered by leveraging technology-linked compliance requirements.

SBI offers special loan to LIC staff to participate in IPO

Gopika Gopakumar

MUMBAI

Lenders have taken special measures to help Life Insurance Corp. of India's (LIC) employees and customers subscribe to the mega initial public offering (IPO). State Bank of India (SBI), for instance, is offering a personal loan of up to ₹20 lakh, or 90% of the purchase price of shares, whichever is lower, to the employees of LIC, at a special rate of 7.35%, lower than the three-year marginal cost of lending rate (MCLR) of 7.4%.

Besides, SBI also waived off the processing fee for the five-year loan for LIC employees, where 10% of the loan amount will be taken as the margin with no security or guarantee. A small portion, or 1.58 million shares on sale is reserved for LIC employees. As of the second day of bidding, this portion of the share sale was oversubscribed 2.21 times, indicating strong interest among the employees.

According to the draft prospectus, an LIC employee, who is also a policy holder and a retail investor, can invest up to ₹6 lakh in the IPO. However, when asked why the maximum loan amount was pegged at ₹20 lakh, an SBI official said that the plan was floated well in advance and the bank was not aware of LIC's terms for subscribing to the IPO.

That apart, LIC employees are also enjoying a discount of ₹45 per share on a price band of

Central Bank set to close 13% of its branches

MUMBAI

Central Bank of India, a state-owned commercial bank, plans to shut 13% of its branches to improve its financial health and bring an end to nearly five years of close scrutiny by the Reserve Bank of India, according to persons aware of the matter and a document seen by Reuters.

The bank is looking to reduce the number of branches by 600 by either shutting down or merging loss-making branches by the end of March 2023, according to the copy of a document reviewed by Reuters.

It is the most drastic step the lender has taken to improve its finances and will be followed by the sale of non-core assets such as real estate, said government official who did not want to be named.

The closure of branches by the eighth largest state-owned lender by assets has not been reported previously. The more than 100-year old lender currently has a network of 4,594 branches.

Central Bank along with a clutch of other lenders was placed under RBI's prompt corrective action (PCA) in 2017 after the regulator found that some state-run lenders were in breach of its rules on regulatory capital, bad loans and leverage ratios. "The bank is struggling to come out of PCA of RBI due to poor performance on profit since 2017 and to utilize manpower in more efficient and effective manner," the document dated 4 May sent out by the headquarters to branches and departments stated.

While IPOs remain open for only 3 days for public subscription, the LIC IPO has been allowed to remain open for 6 days

The retail investor portion was subscribed 93%, while the portion reserved for high net-worth individuals was subscribed 47%, according to data from stock exchanges.

The government, selling a 3.5% stake in the state-owned insurance behemoth, instead of the initially planned 5% due to market condition. The LIC IPO will be a pure offer for sale, and the proceeds will go to the government.

Retail investors were allotted 35% of the total shares on offer, at a discount of ₹45 to the IPO price. About 10% of the float was earmarked for policyholders, who gets a ₹60 discount on each share. The minimum lot size is 15 shares.
